

FOR IMMEDIATE RELEASE

ORPHEO and the INTREPID SEA, AIR & SPACE MUSEUM LAUNCH the “INTREPID AUDIO TOUR”

6/5/2009

The New York branch of OPHRYS Systèmes, a leading company in the audio tour industry, has been selected to design and implement the “INTREPID audio tour”. The visit is narrated by Bill White, President of the Intrepid Museum, and by Susan Marenoff, the Museum’s Executive Director. The audio content is provided by ORPHEO USA Corp.

The tour was launched in time for Fleet Week (the 3rd week of May, 2009) and is already a great success. The equipment supplied is the most up to date audio guide in the Orpheo product range, already in use at international sites such as the Empire State Building in New York, the Great Wall of China, Mont St. Michel in France, and the Prado Museum in Madrid.

The heart of the audio tour is a series of original interviews of pilots and crew members who were there during Intrepid’s greatest and most challenging days, including Senator John McCain and Admiral ‘Doc’ Abbot, the ship’s Captain in 1962, General Colin Powell and Astronaut Scott Carpenter.

Tours are available in English, Spanish, French, German, Italian, Chinese and Japanese. In addition, a children’s tour is offered. A sign language tour will be available on the ORPHEO NEO video guide.
